

Additional Bill of Materials/Kitting Features:

- maintain accurate inventory quantities for your assemblies or raw materials
- relieve materials and receive finished goods in one process
- build non-serialized assemblies that contain either serialized or non-serialized materials and components
- build serialized assemblies that contain either serialized or non-serialized components and materials
- change components for a group of select items with the global replacement of items
- set up your kits with unique inventory numbers and include an unlimited number of components, each with its own item number
- separately track the costs of the components but assign the price to the kit
- enter builds before, during, or after the fact
- easily develop kits for sale and, if necessary, adjust the content of each kit at order entry time
- view a bill of materials in an explorer-style inquiry

Bill of Materials/Kitting Reports:

- Item Where Used Report
- Bill of Materials Definition/Exploded Bill Report
- Bill of Materials Work Order
- Global Replace Log
- Component Cost Report
- Kitting List
- Available Components Report

Combine items and assemblies to create a bill of material. You can also add labor costs.
