

INVENTORY

Make a positive impact on your bottom line

You need to track every aspect of your inventory. You need to know what you have in stock, how much it's worth, and where it's located. You can do it with the TRAVERSE® Inventory application.

TRAVERSE lets you closely monitor inventory movements by tracking detailed inventory history; then, use the Inventory Movement Report to identify your best products and to understand their purchase/sales cycles. You can even spot seasonal demand patterns. The Valuation Report summarizes the value of the items you have on hand and the profit on items sold during the year. With TRAVERSE Inventory, you'll be able to make informed buying and selling decisions, improve customer service, and save money. Like all Open Systems products, source code is available.

You'll have quick, easy access to detailed information about your inventory items from the Inventory Item Maintenance screen.

Alternates and Aliases provide flexible, easy ways to look up inventory items.

Additional Inventory Features:

- multiple warehouse capabilities
- lot tracking
- quantity breaks
- material requisitions
- user-defined fields
- receipts posted online
- quick access to detailed descriptions for each item
- alternate item options
