800-451-7447

Gain Control While Saving Time and Money

- Works the way purchasing managers think
- Helps PO managers gain control of spend
- Cuts total purchasing time and effort in half

866-698-1398

Key Benefits:

- Individual users or departments can requisition items directly from on - line catalogs or in free - form mode.
- A multi - level, on - line approval process prevents items from being ordered without necessary approvals.
- Requisitions are automatically routed by email to the next approver listed in your business rules.
- If denied, requisitions can be returned to the original requisitioner with a reason for the rejection.
- With TRAVERSE Purchase Order Module, you can review requisitions online and convert them into Purchase Orders or Requests for Quotations without re - keying any data.
- Multiple requisitions for similar materials or services can be combined in one order, or a single requisition can be split up into multiple purchase orders for a number of vendors.
- On - line status inquiry and printed status reports make it easy to track the progress of requisitioned items, including expected delivery dates, back - order conditions and assigned buyers.
- ePMX's Requisition Software shows which requisitions are on hold awaiting approval; approved but not ordered, and ordered but not received.
- Additionally, ePMX will display date received and quantity.

Fully Integrated With TRAVERSE 10.5 and 11.0

- Easy Implementation
- No additional integration costs
- Adds spend controls, efficiency, and pays for itself in months!

Applied Business Services, Inc.

Technical Information – ePMX Automated Purchasing Software

Bellwether's **ePMX** automated purchasing software (automated procurement software) is easy to install, deploy and maintain.
